Projects

Box Office Depot

Box Office Depot is a web application that utilizes multiple API's to display new and coming soon movies, movie theaters and show times, and allows the user to also search for theaters and movies. This was a group project that I worked on with three others.

<https://krpharr.github.io/box-office-depot/index.html>

Super Smash Kittens

Super Smash Kittens is an online battle card game, where you can chat and battle with other users in real time.

<https://supersmashkittens.herokuapp.com/>

Lorenzo's List

Lorenzo's List is a heroku deployed application that allows the user to view and post items for sale, as well as message other users to contact about their items. All of the users and items are stored in a SQL database.
