Determined and solution-driven Web Developer, with a background in management, procurement, and analytics. A focus set on meeting the highest standards, user experience, and total client satisfaction. Experience creating websites and web applications using HTML, CSS, JavaScript, Bootstrap, External API's, and jQuery.

Work History

Delaware North - Multi-Unit Manager
Richmond, VA
06/2018 - Current

- Create PO's for the procurement of product that supplies nine total units. This product includes all F&B, paper product, and janitorial supplies
- Manages staff while withholding company policy, standards, and expectations
- Ensures a timely delivery of product through a requisitioning process from the commissary kitchen to each unit
- Review monthly inventory, which includes price updates, inputting of invoices, and inputting of sales and costs
- Create weekly waste reports to find issues with pars, misuse, or over-requisitioning. Create process improvements to limit the above mentioned

The Boathouse - FOH Manager
Richmond, VA
06/2015 - 06/2018

- Hired, trained, scheduled, and managed staff while withholding company policy, standards, and expectations. This also included external guest expectations and ensuring the deliverance of excellence in service
- Controlled BLW costs and managed inventory and procurement of product
- Accurately reported end-of-day sales, and calculated labor costs, food costs, and alcohol costs
